2011

Review

HELPFUL HINT

Glass is one of the hottest trends in tile today. Did you know that because of its' unique properties that it requires different setting techniques and materials? Glass tile is frost proof, resists fading, discoloration, and chemical damage, and is impervious to water and stains. Glass tile also has thermal expansion properties, so if not installed properly, they can chip and crack. There is also nothing that compares to its' shimmer and luminosity. See inside for more information on Laticrete's new Glass Mortar & refer to the 2011 TCNA manual for updated installation tips.

Cascade and Advantage displays for your showroom help your bottom line grow

Slatey from Edimax will make you take a second look

Reportage from Castelvetro makes wooden floors a thing of the past

Dazzling stone and glass mosaics from Alpha

WP-900 - Hydro-bloc Waterproof & Crack Isolation Membrane

A one-component, flexible, load bearing waterproofing latex compound applied by paint roller or quality paint brush to form a seamless waterproof membrane under ceramic tile and stone installations. WP-900 also acts as a crack isolation membrane for these same types of applications.

056 - Premium Sag-Resistant Mortar

Available in both grey and white, this premium-grade, sag resistant mortar, designed specifically for thin or medium-bed, wall, floor and countertop installation of large format tile and stone.

Providing excellent sag resistance and mortar transfer to backs of larger format tile & stone on vertical applications, as well as superior tile support and mortar transfer on horizontal applications.

A premium polymer modified dry set mortar consisting of high performance polymers and water retention additives, carefully graded sands, Portland cement, and special additives, which contribute to the unique characteristics of 56SR.

Bluestone

Inspired by the natural stone from which it derives its name Bluestone features a field of soft earthen tones, enhanced by fossil-like impressions and the subtle pearlescence of embedded shells.

In both natural and semi-polished finishes, Bluestone Porcelain Stone® tile imparts a classic, time-honored elegance to any space.

Designed for both commercial and residential installations, Bluestone contains a minimum of 20 percent recycled content and is manufactured in Crossville using processes that have been certified by Scientific Certification Systems.

It's available in four colorways: Colorado Buff, Arizona Brown, Pennsylvania Blue & Vermont Black in a variety of sizes including - 24 x 24, 12 x 24, 6 x 24, 12 x 12, 6 x 6 field tile, 2 x 2 Mosaic, 3 x 6 Mosaic, Random Mosaics using 2, 4 and 6 tile with staggered joints, Bullnose, Cove Base and more! Because Bluestone is Porcelain Stone tile, it has unsurpassed durability, resists staining and scratching and will remain virtually maintenance free on floors, countertops and walls.
